I We want once more to reiterate that you cut loose from the idea that 20.00 or 25.00 will not buy satisfaction for you in your clothes.

I Don't let inflated money standards blind you to the possibilities of those two prices. Use your buying ability, develop the investigative spirit, cut through the miasma of a hundred claims until you strike the bedrock of fact, and remember that the purchasing power of a dollar is largely determined by the attitude of its owner.

A proper appreciation of these things will bring you to Saks', not because we urge it, but because you cannot, in justice to yourself, do otherwise. Actual comparison will show you, as it has shown us and as it continues to show us, that the maximum purchasing power of 20.00 and 25.00 in clothes is indisputably at Saks'.

As leaders in the ready-for-service field, we are naturally expected to show the very newest and smartest effects in models, fabrics and colorings, and our assortments of both overcoats and suits this fall realize these expectations fully.

The suit models include two and three button coats, with free and easy fronts, narrow shoulders, snug-fitting trousers, and vests that aspire a little higher than the coat. Overcoat models include many long single and double breasted styles, with and without belts. and a sufficient number of conservative models.
